Exercise 4

4 points possible (graded)

<u>Survey</u>

ESTIMATED TIME TO COMPLETE: 6 minutes

Download Python and Get Motivated!

Below is a transcript of a session with the Python shell. Provide the type and value of the expressions being evaluated. If evaluating an expression would cause an error, select NoneType and write 'error' in the box. If the result is a function, select function and write 'function' in the box.

▶ Week 1: **Python Basics** To get the most out of this problem, try to figure out the answers by reading the code, not running it. Run the code in your interpreter only after you've checked your answers a few times.

▼ Week 2: **Simple Programs**

Hint: If you are confused, you may find it helpful to draw out an environment diagram similar to what was presented in lecture.

3. Simple **Algorithms (TIME:**

```
>>> def f(x):
      return x + a
>>> a = 3
```

>>> f(1)

>>> a = 10

4. Functions (TIME: 1:08:06)

Finger Exercises

Complete Programming Experience: polysum

Problem Set 2

Problem Set due Feb 2, 2017 15:30 PST

2.

Week 3: Structured

<u>Types</u>

Week 4: Good **Programming Practices**

- Midterm Exam
- <u>Sandbox</u>

```
>>> x = 12
>>> def g(x):
      x = x + 1
      def h(y):
          return x + y
      return h(6)
>>> g(x)
```
